AVENUE

series

The ultimate compact burglar resistant safe
for the protection of your most valued
possessions. Ideal for apartments
and executive offices.

Model AVE 1000

Model 3000, Interior view

AVENUE

series

EMPIRE SAFE COMPANY, Inc., the leading supplier of safes and vault rooms to the world's finest jewelers has developed a complete selection of high quality safes for personal use.

The Avenue Series is just one of Empire's line of safes serving your needs ranging from apartments and private homes to small businesses and executive offices. The Avenue Series safes are specifically designed to fit into closets, alcoves, even under a table or desk.

The Avenue Series was developed primarily to provide quality burglary protection. As an added feature, each model is lined with insulation in order to provide a degree of fire protection.

CONSTRUCTION

Solid plate steel construction provides exceptional burglary protection.

The **door** (overall 3" thick) is constructed of a 1" solid steel plate. A specially hardened 1/4" steel plate is added to provide exceptional resistance from drilling attacks on the vital locking areas.

The **body** (overall 1" thick) is constructed of 1/2" solid steel plates electrically welded together.

Boltwork Mechanism: The door is secured with a 3-way active boltwork mechanism (plus fixed bolts on the hinge side). Active bolts are 3/4" in diameter and are chrome plated.

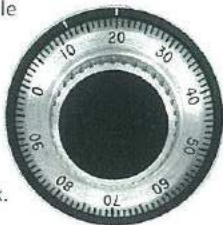

Relocking Mechanism: Additional protection from burglary attack is provided by the incorporation of an independent mechanical relocking device.

A concentrated burglary attack attempting to dislodge the lock from its position will activate this device securing the boltwork in the locked position.

LOCKING OPTIONS

COMBINATION LOCK: All "AVC" models come equipped with a UL listed Group 2 key changeable mechanical combination lock.

DIGITAL LOCKS: All "AVE" models come equipped with a SAFETRON digital lock.

All "AVDL" models come equipped with a high security UL listed digital lock.

Preferred 100 to 1 by our customers, digital locks provide the user with the ability to set one's own private access code. Easy to operate, digital locks permit the user to keep all valued possessions secure and accessible, with little or no inconvenience.

An automatic shutdown feature is incorporated in these digital locks to help prevent code guessing.

A unique feature of this mechanism automatically locks the safe when the door is closed and boltwork extended to the locked position.

Digital locks are battery powered. Batteries are located on the outside of the safe for easy changing.

FIRE PROTECTION

The walls and door are lined internally with fireboard insulation to provide a degree of protection during a fire. Fire protection offered in Avenue Series safes is based on the low fire risk associated with many high rise apartment and office buildings.

OPTIONS

- Jewelry Trays
- Custom Cabinets (available in all finishes)
- Private Interior Compartments

DELIVERY

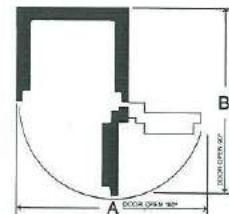

All safes are available for delivery throughout the United States and overseas.

Nationwide service. Complete coordination with architects, designers and contractors.

All models are prepared for anchoring.

HIGHER SECURITY SAFES

For increased burglary and/or fire protection we offer an extensive selection of safes to satisfy more demanding needs.
