~ All Safes are VdS Grade III Torch & Drill Resistant Safes ~

The Diamond TDR 3900 Series is the result of our continuing effort to develop high quality security products to better meet the requirements of a wide variety of end users. Maximum security is assured by the utilization of our TDR cast alloy defense material, consisting of a torch resistant aluminum casting with drill resistant corundum nuggets. Its unique design and *six-sided body and door casting* provides consistent protection throughout, proven to withstand concentrated torch, tool, disk cutter and explosive attacks. The only real difference between this series and the 4000 series is that 2 locks are required on the 4000 series which is why insurance underwriters consider this series equivalent to the TRTL-15x6 security level.

Features:

- UL Group 1 Manipulation Resistant Combination Lock
- *Optional Locks & Configurations Including the "Paxos Advance Redundant Electronic System"*
- Glass Plate Protection / *Multiple Relocking Devices*
- Protection From Side Attacks *On Cross-locking Boltwork & Locking Mechanism*
- Slotted Shelf Standards & Slide-In Shelves *Provides Security Features Not Found in Other Safes*
- Lightweight Characteristics *Allow Models to be Transported in Elevators & Placed in High Rise Buildings*
