

CHATEL TL30 x 6 SAFES

Massive Composite Construction Offering Maximum Protection On All Six Sides

- Body: 2³/₄" thick constructed of extra-hard DRA-AGGAMIX agglomerate and steel plates with reinforced corners plus an additional hard plate made of MANGANESE steel
- Door: 5" thick with a 2³/₄" thick defense barrier constructed of extra-hard agglomerate with CORUNDUM nuggets plus steel plates including a hard plate of MANGANESE steel

Maximum Security Boltwork

- Three-way boltwork with 1¹/₄" thick bolts
- Glass plate, protecting combination lock and bolt, connected by nylon wire to two independent relockers, each of them protected by a hard plate
- Additional mechanical relocker attached to back of combination lock
- Reinforcements to prevent boltwork from being punched in from the side
- Additional deflective plate to prevent drilling from the side

Dual Locks For Added Security

- U.L. approved combination lock
- Second lock, combination or key lock, with its own relocking device and protected by a hard plate
