# PERIOD STYLE SAFES

*LOUIS XV safe (38)*

It is very often difficult to integrate a safe, with its sometimes severe appearance, into the decor of an office or apartment.

*LOUIS XV safe (65)*

This has prompted Fichet-Bauché to produce two period style safes which will easily fit in with Louis XV style furnishings.

LOUIS XV safe (38)

These are true safes which provide the same degree of security as the safes of the "EGIDE" range from which they have been developed.

LOUIS XV safe (65)

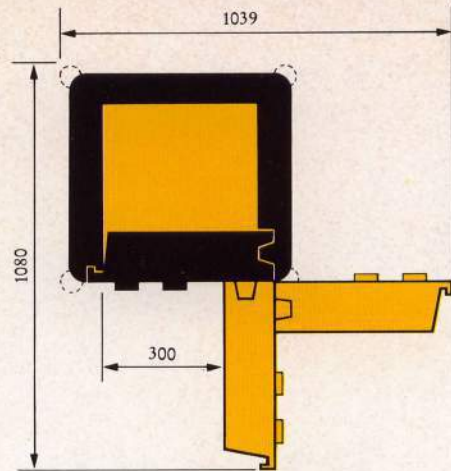

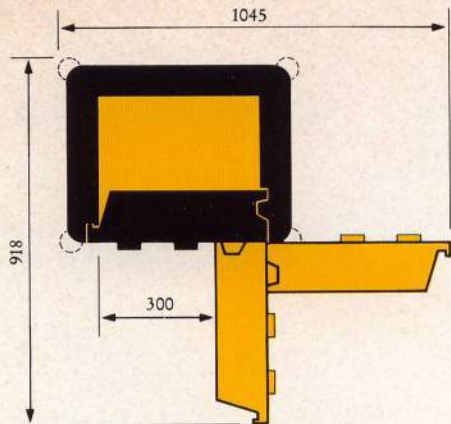

The safes are secured by means of an "M2i" pump lock and a "C2CP" combination made by FICHET-BAUCHE.
