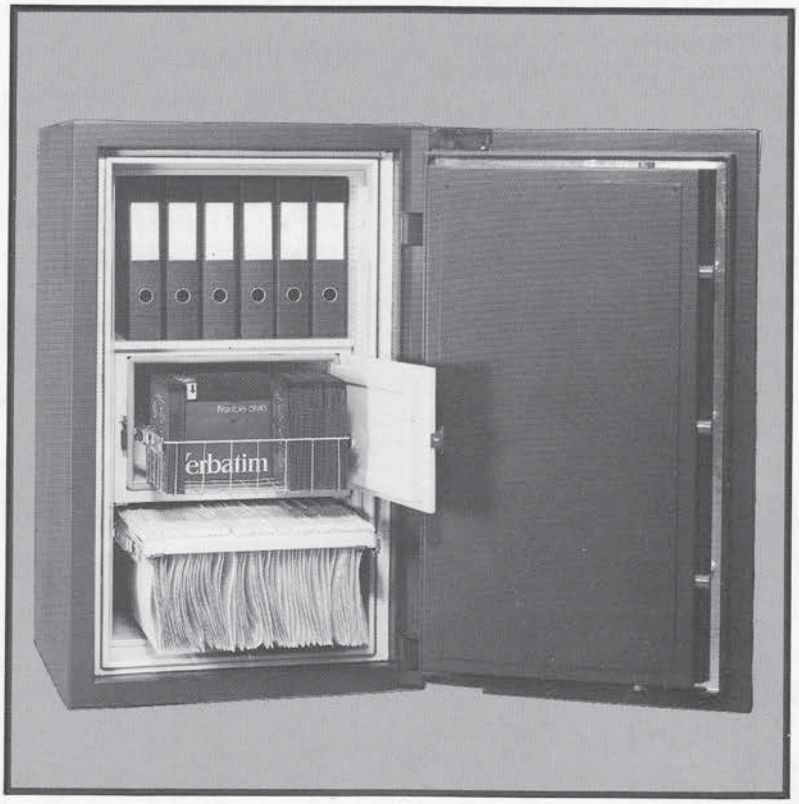
Tested security



KASO-diskette box

KASO

KASO-products have been tested against fire and burglary e.g. in England (fire/FIRTO), Norway (fire/Trondheim), France (fire and burglary/Paris), Sweden (burglary/Stockholm), West Germany

A KASO diskette box provides economical and secure storage space for vital diskette media

The KASO diskette box ensures storage for diskette and magnetic data media with protection against fire and humidity.
The KASO diskette box placed inside a KASO safe provides secure protection for magnetic data media, because it has undergone a severe fire test at the Technical Research Centre of Finland.
During the one hour fire test the average temperature increase inside the box was a mere 15°C and the highest measured rise in temperature was 16°C. The maximum temperature inside the box was 34°C.

FIRE TEST

1 hour at 945°C at the Technical Research Centre of Finland, fire test No. PAL 2664 b.
Protection indicated by the test is provided by the diskette box only when box is placed inside the KASO safe.

All rights to alterations reserved.

DIMENSIONS OF BOX

External dimensions
height × length × depth 320 × 476 × 346 mm
Internal dimensions
height × length × depth 240 × 396 × 270 mm
Location of the diskette box inside the safe can be varied which means the capacity of the safe can be utilised to the best possible advantage.

Extra fittings:

— a pull-out basket with rails for diskettes 8″
— a pull-out basket with rails for mini diskettes 5 1/4″
