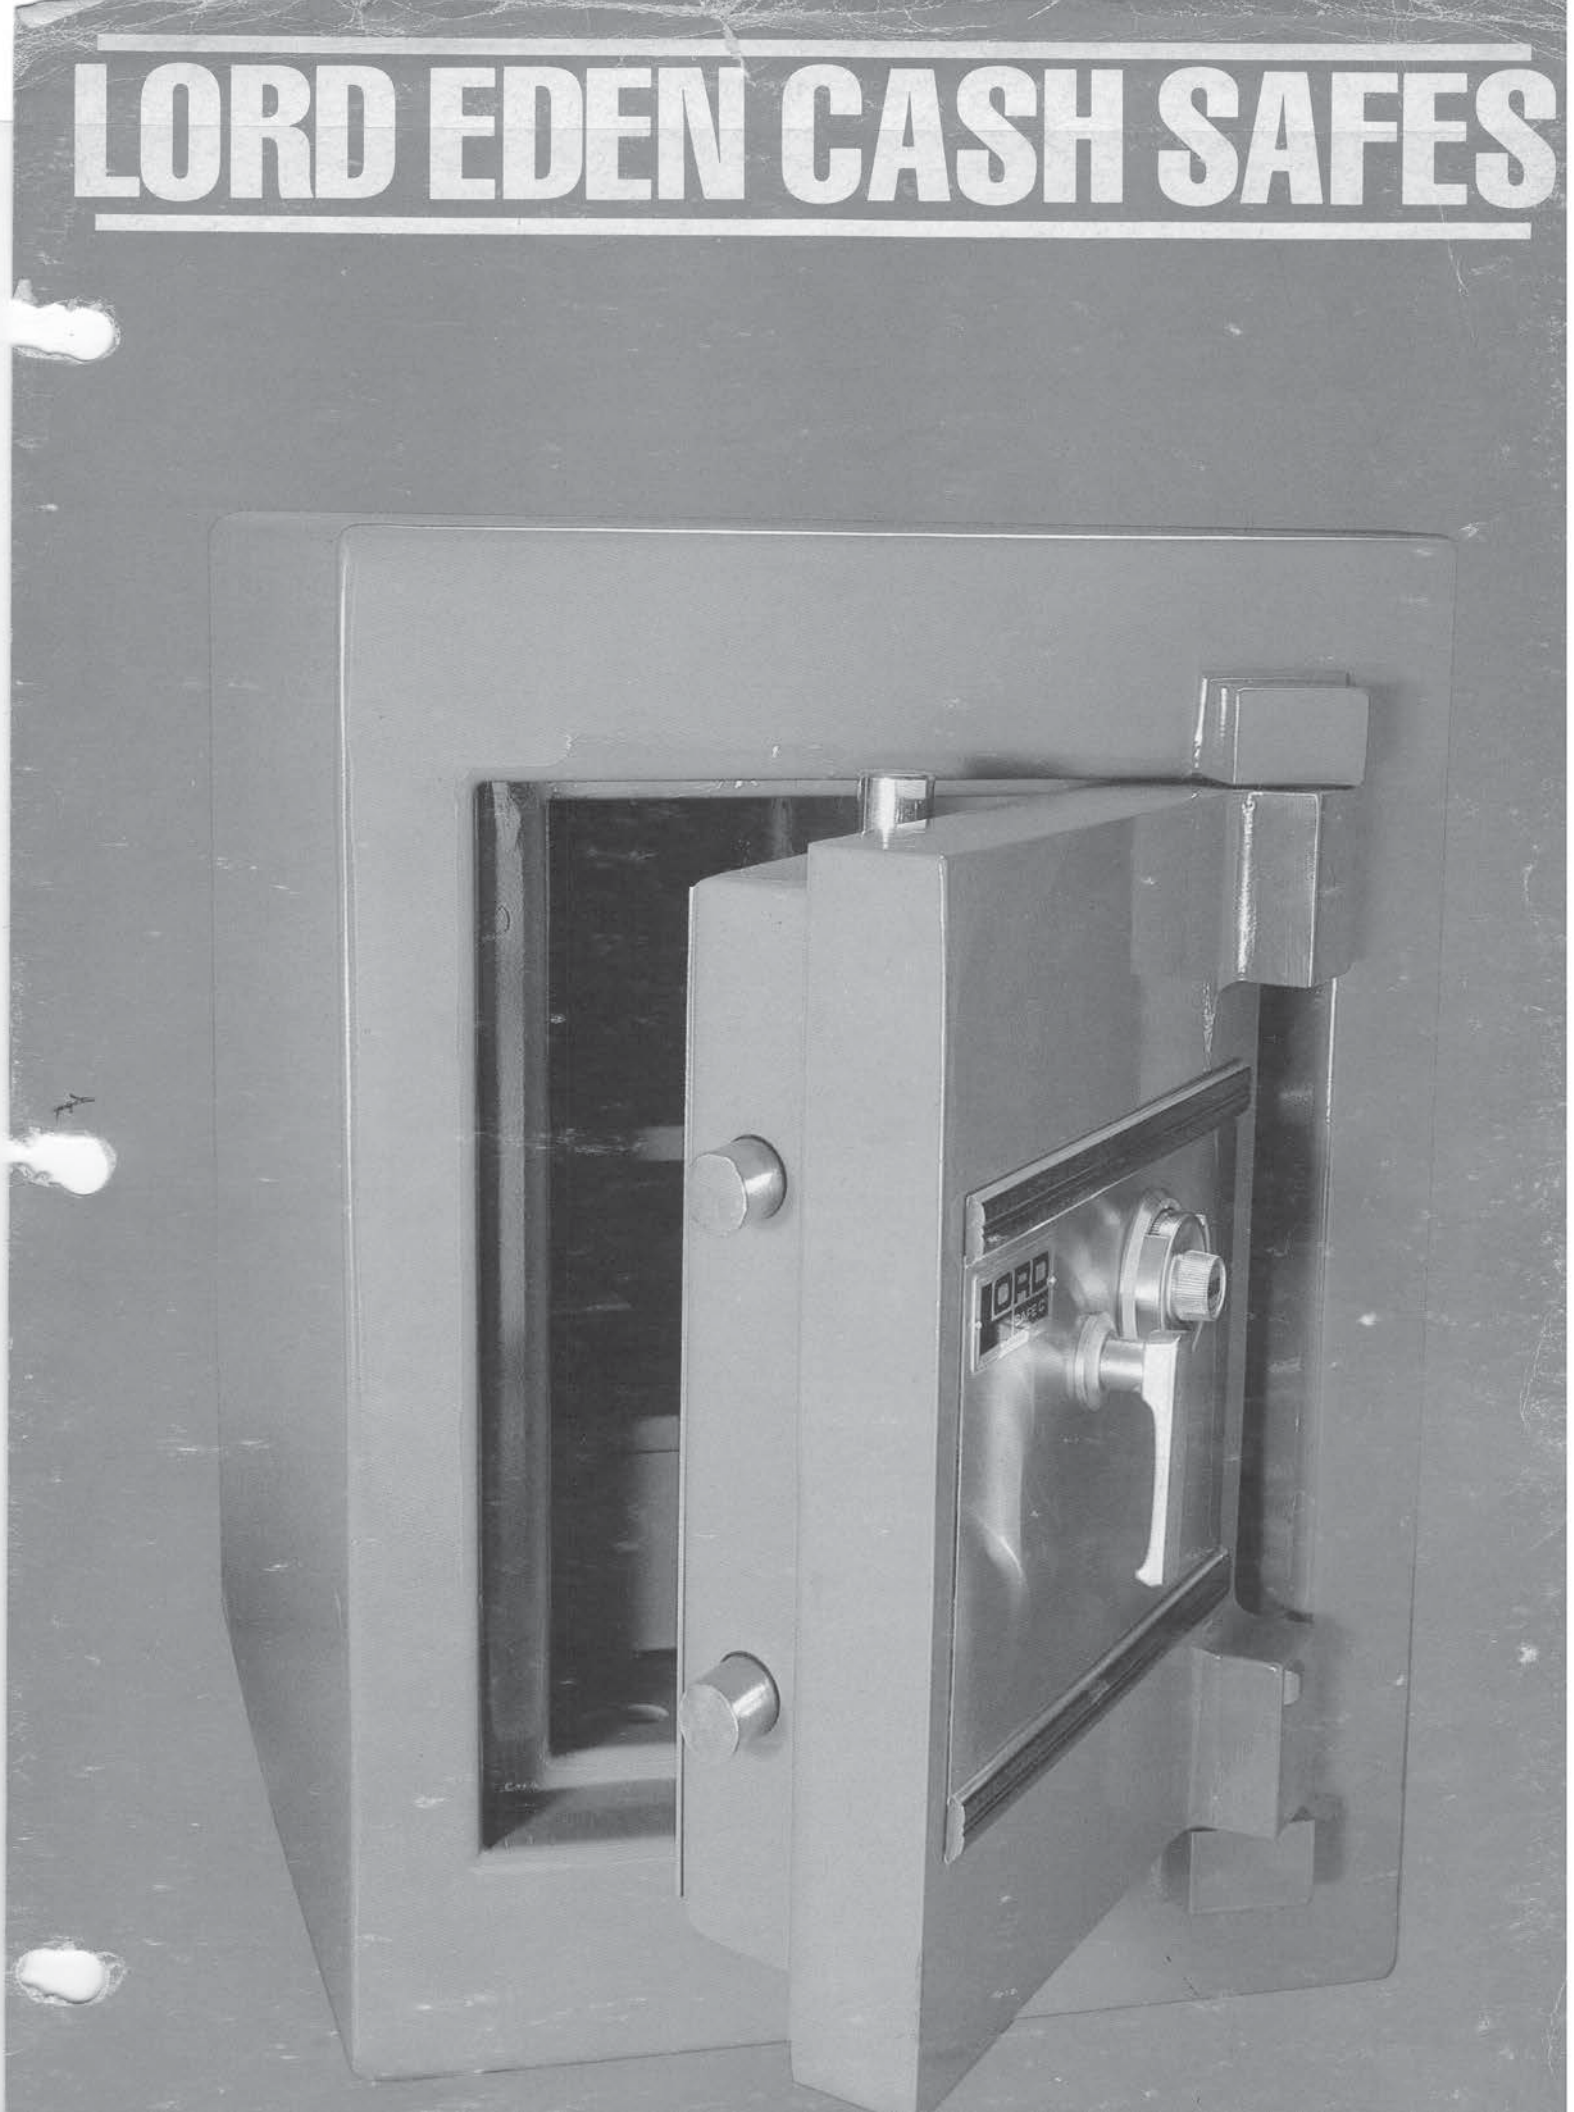
LORD EDEN CASH SAFES



LORD EDEN CASH SAFES

AUSTRALIAN MADE

This unique safe is the achievement of both extensive research and development which has resulted in a high security safe designed to resist the many weapons used in the criminals armoury. Such weapons include oxy-acetylene, explosives, high speed and tungsten drills used with magnetic holding devices and brute force.
The LORD Eden cash safes are particularly suited to the many varied business situations where there is a high risk value for the protection of considerable sums of money, negotiables and high valued items.

Specifications

Doors — G3 & G4

The door has an overall thickness of 176 mm encasing between the heavy steel structure the LORD special TDR (torch and drill resistant) alloy, with the lockcase forming an integral part of the door defensive slab.

Body — G3

The body obtains its immense strength from the monolithic TDR alloy construction which is a single cast unit of consistent strength encased between heavy steel.

Body — G4

The body is similar to the G3 except that the defensive barrier consists of 'Lord' special high density refractory material.

Boltwork:

The large 38 mm diameter steel four way running bolts secure the safe door in specially reinforced sections in all four sides of the safe body, ensuring maximum protection against intrusion by explosives.

Automatic Deadlocking:

A standard on all LORD Eden safes is the special deadlocking system. Mounted on glass the system is designed to activate securing the locking bolts if the door is attacked by explosives or other means.

Locking:

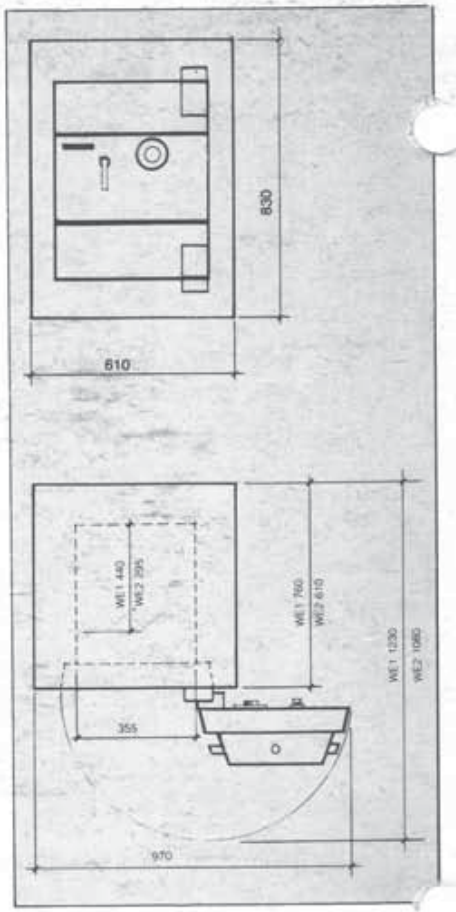
The locking mechanism is controlled by a three wheel keyless combination lock capable of one million code variations, which can be easily altered at any time by the user. Variations of the locking can be arranged at a slightly extra cost such as: a four wheel combination lock complete with a dial check lock giving 100 million code variations, or a keylock if preferred.

Internal Fittings:

Fully adjustable shelves, lockable treasufy cupboards and drawers are available to suit your specific need.

Finish:

All LORD safes are finished in high quality lacquers which enhance the brushed chrome fascia panel, handle and locks. For an individual colour choice to compliment your decor discuss your requirements with your LORD safe representative.



MODEL	WE1	WE2
EXTERNAL HEIGHT	830 (2'8¾")	830 (2'8¾")
EXTERNAL WIDTH	610 (2'0")	610 (2'0")
EXTERNAL DEPTH	760 (2'6")	610 (2'0")
INTERNAL HEIGHT	535 (1'9¼")	535 (1'9¼")
INTERNAL WIDTH	355 (1'2")	355 (1'2")
INTERNAL DEPTH	440 (1'5½")	295 (0'11¾")
CUBIC CAPACITY IN METRES	0.084 (3.0ft³)	0.056 (2.0ft³)
TOTAL WEIGHT	860 (1897 lbs)	700 (1544 lbs)
