

# Centennial™

It's safe to say we are serious about security. The Centennial safes are ideal in high-risk fire areas, such as automotive repair shops, paint shops, chemical and/or fertilizer storage facilities and other places where a sustained fire is a risk. Five of seven models carry a UL® Class 350 2-Hour Fire Rating and all Centennial models have passed UL's impact test\*. All meet stringent security tests and carry the RSC UL label and UL-listed relocker.

\*The UL impact test calls for the safe to be heated to 1550°F for 30 minutes (1638°F for 45 minutes for a 2-hour fire-rated safe) then dropped onto concrete rubble from a height of 30 feet. Then it is inverted and reheated for another 30 minutes (45 minutes for a 2-hour rated safe). The safe must maintain its integrity throughout the test and protect all contents.

## Fire- & Burglary-Resistant Safes

**Centennial  
BR3921-2**

Equipped with two standard adjustable shelves and extra hardplate for enhanced drill resistance. All Centennial safes have a UL fire and impact label, a UL RSC burglary label, and a high-security Medeco® key lock. Shown in our Graphite color.

**Centennial  
BR2021-2**

Equipped with two standard adjustable shelves and a high-security Medeco® key lock for added security and day use. Shown in our Light Gray color.

<sup>1</sup> Includes 1⅛" for door handles and dials.

### Burglary Ratings

 The Lock Icon designates the safe's ability to protect against unauthorized entry and theft. The number represents the increasing level of burglary protection within the safe line.

These safes come with a lifetime replacement warranty in case of fire and a 1-year limited warranty.

### Fire Ratings

 The Fire Icon designates the safe's ability to protect against fire damage. The number in the icon represents the time frame of the test the safe has passed. Icons with a (+) represent that the safe has earned UL's impact rating.
