

TITAN FIRE SAFE

FOR PROTECTION OF YOUR VITAL RECORDS

The TITAN range of Fire Resisting Safes has been designed specifically to provide Security for important Documents, Books, Ledgers, P.A.Y.E. Records, Insurance Cards, Drawings, Specifications, Statistics and all other papers which are indispensable to the continuity of a business.

The TITAN has the same Fire Resisting qualities as our well known VULCAN Safe, which has been subjected to an independent fire test. A Safe containing a Book and Paper Documents was placed in a Furnace pre-heated to 1,300°F. After 30 minutes it was withdrawn and cooled.

When the Safe was opened the contents were found to be in good condition.

For peace of mind you should install a TITAN Fire Safe.

SPECIFICATION

BODY

The outer body is made from Steel Plate bent cold at all twelve corners. This method of construction gives immense strength.

INSULATION

The Chambers between the outer Body and inner Lining are filled with a Fire Resisting composition, which has been subjected to extreme heat tests.

DOOR

The overall thickness of the Door is 4 1/2 inches and incorporates a Fire Resisting composition.

It is secured by Solid Steel round moving bolts which are operated by the handle, and solid steel dog bolts which retain the door in the locked position if the hinges are removed by attack.

A high security 7 lever lock is supplied with 2 keys.

Combination locks can be fitted if required, at extra cost.

FINISH

The TITAN has an attractive grey finish with satin chrome fittings.
